

Steffi LaZerte

How can ornithologists find R packages?

Comment les ornithologues peuvent-ils trouver des packages R?

Symposium: Great R packages for Ornithologists, AOS & SCO-SOC 2021

What is R? | Qu'est ce que R?

@steffilazerte

A statistical programming language and environment

- Great for data management/manipulation (not just stats)
- Free and Open Source Software (FOSS)
- Almost infinitely extensible with packages

Un environnement et langage de programmation statistique

- Idéal pour la gestion/manipulation des données (pas seulement les stats)
- Source libre et ouvert
- Presque infiniment extensible avec des packages

To determine whether the odds of being an atypical singer increased with urbanization, we performed a logistic regression of male singer type (atypical/typical) against the urbanization index using R statistical software (version 3.3.2; R Core Team 2016). We calculated bias-corrected and adjusted (BCa) bootstrap 95% CI for coefficients. We performed 10000 replicates using the boot package for R (version 1.3-20; Angelo and Ripley 2017). Figures were created using the R package ggplot2 (version 2.2.1; Wickham 2009). Spectrograms were created with Hanning window lengths of 1024 using the R packages ggplot2 and seewave (version 2.0.5; Sueur *et al.* 2008).

seewave~

Ask your colleagues! | Demandez à vos collègues! @steffilazerte

In this symposium alone... | Dans ce seul symposium...

- **dplyr**: A useful toolbox for manipulating data
- **sf**, **raster**, and **tmap**: The spatial data trinity
- **osmdata**: Roadless areas and avian diversity,
- **seewave** and **tuneR**: Sound analysis in ornithology
- **warbler** and **Rraven**: Bioacoustics in R
- **soundecology**: Using acoustic indices for landscape assessment and monitoring
- **naturecounts**: Millions of bird occurrence records at your fingertips
- **bbsAssistant**: An R package for downloading and handling data and information from the North American Breeding Bird Survey
- **motus**: Managing motus data in R
- **track2KBA**: An R package for identifying important sites for biodiversity from tracking data
- **MixSIAR**: An R package for avian diet analysis
- **INLA**: A way for ecologists to overcome their worst impulses
- **pavo**: Color analysis in birds
- **moult** and **moultmcmc**: Inference for moult phenology models
